ANNOUNCEMENT

DATE: December 8, 2005

FROM: Al Claiborne
Professor and Co-Director
Chair, Mid-Atlantic 2006
alc@csb.wfu.edu

SUBJECT: 36th Mid-Atlantic Macromolecular Crystallography Meeting

On behalf of the organizing committee, I am pleased to announce the upcoming Mid-Atlantic Macromolecular Crystallography Meeting, which will be held June 1-3 (Thursday-Saturday), 2006 at the Benson Center on the Wake Forest University Reynolda Campus, in Winston-Salem, NC. The opening session on Thursday, June 1, will feature two outstanding Keynote Lectures on the topic of "Supramolecular Assemblies," by Prof. Tomitake Tsukihara, Osaka University, and Prof. Jack Johnson, Scripps Research Institute.

The 36th Meeting website (<http://csb.wfu.edu/midatlantic06>) is already available, with several informative links. While every effort has been made to identify interested individuals and potential attendees in our master e-mail list, please note that there is also a self-subscription service ("Registration") on the website. Any of your colleagues who do not receive this first announcement directly are encouraged to subscribe for future updates through this Midatlantic06 list. We currently anticipate adding official Registration, Accommodations, and other important functions to the website in early March, 2006.

As we prepare for the Meeting, we would like to extend our warmest invitation for everyone to attend. For now, please bookmark the Midatlantic06 website and meeting dates and distribute this announcement among your colleagues. Thank you very much in advance for your help and support.
